

## Database Administrator

- Industry leader
- Informal team environment and flexible working arrangements
- Junior to mid-level permanent role offering competitive package

Work on best-of-breed technology for the Oil and Gas sector in Adelaide's CBD? – Absolutely! Join a team with genuine passion for our solutions.

Petrosys has been providing geotechnical and data management software and solutions for the oil and gas exploration sector for over 25 years. With a Head Office in Adelaide and regional offices in Perth, Europe, North America and Asia, our global client base represents the “Who's Who” of the industry.

To assist our further growth and continuous product enhancement, we're seeking an experienced Database Administrator to join our team on a permanent basis.

With one to five years DBA experience and solid IT qualifications, you will be able to step into this role within the Petrosys Database team and hit the ground running in a growth industry.

Reporting to the Senior Database Administrator, your responsibilities will include:

- Maintenance and installation of Oracle database instances for hosting Petrosys and PPDM database models.
- Data loading via Oracle SQL Loader, Oracle Import/Export, Oracle Data Pump.
- Development and critical optimisation of SQL queries for both general and client specific needs.
- Assisting the Petrosys Support group resolve database related issues for clients.

To succeed in this role your skills and attributes must include:

- One to five years experience in Oracle database administration.
- Proficiency in SQL with an emphasis on Oracle specifics.
- Linux scripting and shell commands.

In addition, although not mandatory, experience in the following areas would be highly regarded:

- ESRI ArcSDE experience
- Oracle Spatial (SDO) experience
- Java - for writing data loaders
- Windows System Administration skills - installations, permissions, networking
- Familiarity with the PPDM data model.

An attractive salary package, commensurate with experience is available.

If you'd like to develop your skills working with a small but highly experienced development team, this role will appeal to you. Petrosys offers an informal working environment with good links to public transport and flexible working arrangements. You will work on cutting-edge projects and be part of a team of true, technical professionals with a genuine passion for the project. Our tools manage issue tracking, configuration management, scheduling, code reviews, documentation and continuous builds and testing aimed at achieving best practice.

Applications close Monday, 27 February and should be forwarded to the Operations Manager at [jobs@petrosys.com.au](mailto:jobs@petrosys.com.au). Queries relating to this opportunity can also be directed to the Operations Manager.
