

## Software Test Analyst

- Industry leader
- Informal team environment and flexible working arrangements
- Junior to mid-level permanent role offering competitive package

Work on best-of-breed technology for the Oil and Gas sector in Adelaide's CBD? – Absolutely! Join a team with genuine passion for our solutions.

Petrosys has been providing geotechnical and data management software and solutions for the oil and gas exploration sector for over 25 years. With a Head Office in Adelaide and regional offices in Perth, Europe, North America and Asia, our global client base represents the “Who's Who” of the industry.

To continue delivering quality software to its clients worldwide, Petrosys needs to grow its Quality Assurance team. If you would like to join a dynamic group of professionals with a focus on satisfying customers, then this permanent role could be for you.

With one to five years software testing experience and solid IT qualifications, you will be able to step into a junior to mid-level role within the Petrosys QA team and hit the ground running in this growth industry.

Reporting to the Quality Assurance Manager, your responsibilities will include:

- Testing of our products against their functional specification.
- Assessing and providing feedback on the usability of our products.
- Providing input to the development team from the user and tester perspectives.
- Monitoring the end-to-end development process to assist in the delivery of quality software that satisfies our customers.
- Contributing to support documentation, including help topics and marketing material.

To succeed in this role your skills and attributes must include:

- One to five years experience as a software tester, including test planning, design, execution and defect resolution.
- Ability to work independently and in a small team.
- Strong attention to detail and process.
- Willingness to learn new concepts and challenge the status quo with innovative solutions.
- Taking ownership of challenging tasks.
- Strong ability to communicate effectively on all levels.
- Advanced computer skills in Windows and/or Linux environments.
- IT-related bachelor (or higher) degree, or demonstrated industry work experience equivalent.

In addition, although not mandatory, experience in the following areas would be highly regarded:

- Mapping, geoscience or geophysics experience, in particular in the Oil & Gas industry.
- Usage of Petrosys or similar packages within the Oil & Gas industry.
- Test automation and scripting.

An attractive salary package, commensurate with experience is available.

If you'd like to develop your skills working with a small but highly experienced team, this role will appeal to you. Petrosys offers an informal working environment with good links to public transport and flexible working arrangements. You will work on cutting-edge projects and be part of a team of true, technical professionals with a genuine passion for the project. Our tools manage issue tracking, configuration management, scheduling, code reviews, documentation and continuous builds and testing aimed at achieving for best practice.

Applications close Monday, 27 February and should be forwarded to the Operations Manager at [jobs@petrosys.com.au](mailto:jobs@petrosys.com.au). Queries relating to this opportunity can also be directed to the Operations Manager.
