# Interica DataCentre: Your Trusted Partner for Energy Data Transformation and Storage

Secure, reliable, and compliant data solutions for the energy industry

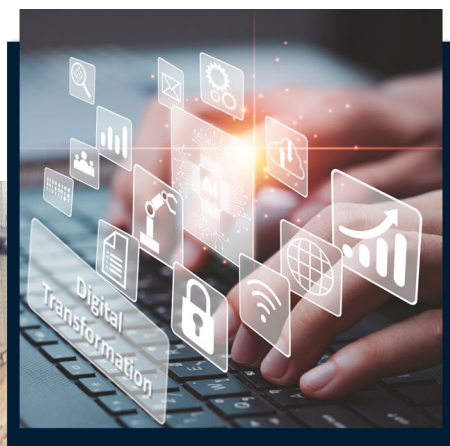

In today's digital age, data is essential to the energy industry. Interica DataCentre is a leading provider of data transformation and storage services, helping businesses in the energy sector to optimize their data infrastructure.

We offer a comprehensive suite of services to meet your unique needs, including:

**Data transformation:** We can convert your physical media, such as well logs and seismic tapes, into secure and accessible digital formats.

**Data storage:** We provide temperature and climate-controlled data storage solutions which are fine-tuned for long-term seismic tape storage needs.

**Regulatory compliance:** Our team of experts can help you ensure that your data management practices comply with all relevant regulations.

## Benefits of using Interica DataCentre:

**Improved data accessibility:** Our solutions make it easy to access and retrieve your data whenever you need it.

**Reduced costs:** Cut down the need for onsite physical storage space and IT infrastructure with our data transformation and storage solutions. Our bespoke facility is designed for preserving the lifespan of seismic tapes.

**Enhanced data security:** We take data security seriously and employ industry-leading security measures to protect your data.

**Improved regulatory compliance:** Our team can help you avoid costly fines and penalties by ensuring that your data management practices comply with all relevant regulations.

## Interica DataCentre: A Global Leader in Data Management

### Subsurface Data Management Services

We are experts in the efficient and professional management of subsurface data, supporting Oil and Gas companies with diverse projects such as:

- Advisory services
- Data audits
- Organisational process & review
- Project management
- E&P content profiling services
- Workflow/dataflow mapping
- Bespoke application & database development
- Information management training
- G&G applications & database support
- Data archiving services
- Data loading services

We can provide a range of skilled professionals to work onsite at clients' offices for short or long-term assignments. Our consultants have both E&P data management knowledge and specialist capabilities covering many unique areas. We are a global organisation and our resources can be deployed quickly and efficiently to meet your company's needs.

## IDC INTERICA DataCentre

Proven data management solutions for the energy sector. Our expertise, security, and global reach ensure your energy data is transformed, stored, and compliant.
