

CAREER OPPORTUNITY

Senior Software Developer – Full Stack

Petrosys and Interica are recruiting for an enthusiastic and motivated senior software developer to join the development team on a full-time basis to enhance and maintain our product suite. The role is U.K based with remote and flexible working. You should be passionate about software development, consider yourself an expert in your field, be able to quickly pick up new technologies and have a desire to push boundaries.

Petrosys and Interica are leading global suppliers of sophisticated information management software and consultancy services to blue chip customers in the Energy sector. If you want to work with a great team, using some of the latest technology to deploy innovative software to users, this role will give you that, a platform to contribute and advance your career in a small global company.

Key responsibilities:

- Design and develop innovative software solutions, following industry standards, the Interica software development life cycle and ensuring ensure tasks are met with the highest quality
- Work in an agile development team focused on continuous delivery of software in a collaborative environment, contributing to the delivery of high-quality solutions to our customers.
- Collaborate with your peers to improve products, technology, code, patterns, knowledge, infrastructure, methodologies and skill levels across the team.
- Understand the challenges and opportunities facing the business and show initiative when finding solutions to problems.

Qualifications/Skills/Experience:

- A degree in Computer Science, Maths, Science, Engineering or equivalent with a minimum of 7 years' industry experience
 - Mandatory development skills: Java, JavaScript, Angular and REST web services
 - Desirable skills: RxJS, Gradle, Git, Oracle, SQL, Linux and Windows
 - Experience in graph databases and TinkerPop/Gremlin would be a real bonus
 - Working knowledge of current development methodologies (Agile / Scrum) with excellent analysis, estimation and documentation abilities.
 - Confidence to express ideas as part of a creative team
 - Able to collaborate internally and with our sister companies, suppliers, partners and customers
 - The ability to meet deadlines without compromising quality or functionality
 - Domain knowledge of Petrotechnical Applications, Geophysical Data Processing Applications, Data Management, Geographic Information Systems, AI or Data Science would complement the role
-

Senior Software Developer – Full Stack
