

CAREER OPPORTUNITY

Senior Software QA Engineer

Petrosys is currently seeking a highly organised, motivated and outcome focused Senior Software QA Engineer to join our rapidly growing global organisation. The role will be based out of the Petrosys office in Kuala Lumpur, Malaysia.

About the role

We are looking for a strong analytical, detail-oriented, self-motivated Senior Software QA Engineer to work as part of a scrum team responsible for a product used to manage data for laboratories.

You will be responsible for the software's quality with proper test script design and testing, maintaining and extending existing test scripts. Working closely with the Development team and Product Owner, you will help ensure Datamine creates world class software solutions and enjoy enabling customers to implement mission-critical products.

Role responsibilities:

- Collaborate with the Development Team and Product Owner to develop effective strategies and test plans.
- Execute test scripts and review results.
- Find and report bugs and glitches.

Skills and experience

- Minimum 5 years' experience in a software QA role.
- Bachelor's Degree in Computer Science/Information Technology or a related field.
- Familiar with Agile Frameworks.
- Ability to communicate effectively in both written and verbal formats.
- Effective time management skills and attention to detail.
- Able to work well in a global team environment and communicate with people of differing technical and cultural backgrounds.
- Exposure in selenium test automation would be highly regarded but not essential.

Senior Software QA Engineer

Benefits

You will enjoy a competitive salary based on your experience plus you will be part of a leading edge, growing organisation which values your professional growth and development.

Employment Type

Full-time
